## 3. ECOLOGICAL INFORMATION

### 3.1 Habitat types present on the site and assessment for them

[Back to top](#)

Annex I Habitat types						Site assessment				
Code	PF	NP	Cover [ha]	Cave [number]	Data quality	A B C D	A B C			
						Representativity	Relative Surface	Conservation	Global	
1240			0.36		M	C	C	B	C	
2250			15.61		G	C	C	C	C	
2270			128.53		G	C	C	C	C	

**PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.

**NP:** in case that a habitat type no longer exists in the site enter: x (optional)

**Cover:** decimal values can be entered

**Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.

**Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

### 3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

**Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles

**S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

**NP:** in case that a species is no longer present in the site enter: x (optional)

**Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

**Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

**Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

**Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

### 3.3 Other important species of flora and fauna (optional)

### Other Site Characteristics

La ZEC se extiende por una franja del litoral conformada por dunas estabilizadas que penetran tierra adentro.

### 4.2 Quality and importance

La ZEC es importante por los Hábitats de Interés Comunitario presentes vinculados a los sistemas dunares: 2250\* y 2270\*, ambos prioritarios y que albergan una serie de especies amenazadas y endémicas de flora, como Thymus albicans (tomillo blanco), especie catalogada en peligro de extinción; también Allium pruinatum, Juniperus oxycedrus subsp. macrocarpa (enebro marítimo), Drosophyllum lusitanicum (atrápamoscas) y Hymenostemma pseudanthemis (margarita de arena), estas especies catalogadas como vulnerables y la última, además fué motivo de declaración del LIC. También es importante la ZEC porque constituye uno de los escasos enclaves de la provincia de Cádiz en los que habita la especie salinete (Aphanius baeticus), cuya distribución se restringe únicamente a otras dos provincias (Huelva y Sevilla), contando en total con solo una decena de poblaciones que tienen una tendencia general regresiva. Se considera un endemismo de Andalucía occidental. En el pasado se suponía que el fartet (Aphanius iberus) se distribuía por todo el litoral mediterráneo español desde Cataluña hasta Andalucía, incluidas unas

pequeñas poblaciones de la especie en el litoral atlántico andaluz. Sin embargo, estudios morfológicos y filogenéticos observaron diferencias significativas entre las poblaciones orientales y occidentales, demostrando que las poblaciones atlánticas pertenecen a otra línea evolutiva diferente de las mediterráneas, dando como resultado la descripción de esta nueva especie del género, el salinete (*Aphanius baeticus*), que es como en la actualidad se considera. Es por ello que en el Formulario Normalizado de Datos Natura 2000 del LIC Pinar de Roche se hacía referencia al fartet en lugar de al salinete. Y así se recoge en los anexos de la Directiva Hábitats.

#### 4.3 Threats, pressures and activities with impacts on the site
